defining a first set of coordinates of pixels in the destination image file;

defining a second set of coordinates of pixels in the source image file;

identifying coordinates of the second set that correspond to coordinates of the first set;

inserting pixel data for pixel locations corresponding to the second set of coordinates into pixel locations corresponding to the first set of coordinates.

REMARKS

This Amendment is intended to correct inadvertent typographical errors in Claims 2 and 13 of the application as filed. Basis for the Amendment is provided in the Specification, for example, at page 6, lines 16-20, as well as Claims 2 and 13 as originally filed. No issue of new matter is presented.

Respectfully submitted,

APPENDIX
Changes made by Preliminary Amendment filed February 22, 2002 for
Application Serial No. 10/081,545

IN THE CLAIMS:

Claim 2 has been amended as follows:

2.   (Amended)   A method according to Claim 1, wherein the step of mapping pixel data from the source image file to the destination image file buffer comprises the steps of:

defining a first set of coordinates of pixels in the destination image file;

defining a second set of coordinates of pixels in the source image file;

identifying coordinates of the second set that correspond to coordinates of the first set;

inserting pixel data for pixel locations corresponding to the ~~first~~ second set of coordinates into pixel locations corresponding to the ~~second~~ first set of coordinates.

Claim 13 has been amended as follows:

13.   (Amended)   An apparatus according to Claim 12, wherein the process or further serves as means for:

defining a first set of coordinates of pixels in the destination image file;

defining a second set of coordinates of pixels in the source image file;

identifying coordinates of the second set that correspond to coordinates of the first set;

inserting pixel data for pixel locations corresponding to the ~~first~~ second set of coordinates into pixel locations corresponding to the ~~second~~ first set of coordinates.
